

Laser Therapy at Northside Podiatry

Become Pain Free the Newest Way

MLS Laser Therapy is an effective, painless treatment for all types of pain relief that has been cleared by the FDA and proven successful as evidenced by extensive and credible research studies conducted in our country's finest institutions, including Harvard Medical School.

Our laser is a dual-waved synchronized fully robotic MLS Laser. Our laser uses specific wavelengths of light that have a strong anti-inflammatory, anti-edema effect on tissues that are exposed to the laser. As a result of the MLS Laser, the cells of tendons, ligaments and muscles repair themselves faster. In simple terms, laser energy kick-starts the healing process, thereby speeding recovery. No matter if you have long standing pain from prior foot or ankle surgery or injury, foot or ankle arthritis, or you have a new injury our laser therapy has been proven to work. Here is what you need to do now. Call our office at **404-843-0090** to set-up an appointment to see if MLS Laser Therapy is right for you.
